NAD+ MENU

INTRAVENOUS NAD+

Each IV drip includes an infusion of B1, B2, B3, B5, B12, Choline, Carnitine, Inositol, Methionine, Arginine, Lysine, Ornithine, Glutamine, Glycine & Magnesium to optimise results.

We generally recommend to complete 5x IV NAD+ sessions as a loading dose, preferably within a 10-14 day period. These can also be spread out to 1 per week, for 5 weeks.

This is considered an intensive loading dose. There are some instances where the dose or frequency should be increased dependant on health history and goals. Please consult your healthcare practitioner to find out the best option for you.

5x 500mg	\$2795
5x 750mg	\$3295
5x 1000mg	\$3795

NAD+ AT HOME PROGRAM

The NAD+ at home program involves the client giving themselves a small injection of NAD+ into subcutaneous (fatty) tissue – usually in the stomach or upper leg.

We recommend a month long protocol of administering 0.5ml daily for 5 days per week, with 2 days off each week.

Included in the package is everything required for the program.

1x 500mg/5ml NAD+ vial package	\$400
2x 500mg/5ml NAD+ vials package	\$699
3x 500mg/5ml NAD+ vials package	\$899
